Across the vastness of space, evil flourishes in the darkness between stars. With territories spread far and wide across the Galactic Federation, pirates and hijackers have ransacked these distant colonies with cruel disregard for the innocent scientists living within them.

Yet there is a cosmic vigilante who metes out justice across the spaceways, bringing vengeance to those who prey upon the defenseless.

They call him the...

TOM SNIEGOSKI DISCUSSES HIS DREAM PROJECT — THE HERCULOIDS

Tom, when we first announced that you were attached to *The Herculoids*, and then again when we revealed more about the series at New York Comic Con this year, you mentioned that this is sort of a dream project for you. Can you tell us more about that, as well as your history with and affection for *The Herculoids*?

The Herculoids has always been a kind of Holy Grail project for me. I can still remember sitting in front of the television in 1967 (agh, I'm old!) watching episodes of this show and having my mind completely blown. There were monsters, but they were heroes, and they were fighting aliens and robots and all kinds of crazy crap! *The Herculoids* just found their way into my brain, made a nice nest, and stayed there into adulthood. I can remember, when I first got into comics, thinking that there should be a *Herculoids* comic, and I even looked for who might have the license, but nothing ever came of it. I never actually believed that I would ever write these amazing characters, but guess what? I WAS WRONG!

***The Herculoids* has such an interesting premise: It's an eclectic cast of mixed characters, and often they're kind of trying to hide and protect their existence and prosperity. How do you view this setup, and how are you approaching crafting your own original stories around it?**

What I found interesting about the series — and it really came to mind when re-watching episodes — was that various races all over the universe REALLY wanted a piece of Amzot. This fascinated me, and made me start to think about what made this planet so damn special that they would need these incredible main characters to protect it. I really enjoy the basic premise of the series — invaders come to Amzot, try to conquer Amzot, and then get their butts handed to them by the Herculoids — but now, I'm going to be giving some back story as to what makes this world so darn valuable.

Speaking of the cast, it's almost an understatement to say that it's unique and colorful. There is the central trio of Zandor, Tara, and Dorno, but their companions Zok, Igoo, Tundro, Gloop, and Gleep really make the series stand out so much. How are you balancing this cast as well as finding their voices (or lack of voices, in several cases)? And do you have any favorites in writing them?

Funny story, I actually freaked out a bit when I realized that Zok, Igoo, Tundro, Gloop, and Gleep don't speak! Sure, they communicate in their own unique languages/voices, but not in a way that could fill a word balloon with some amazing writing. Working on those characters has been a bit of a challenge, but I think that once I put my thinking cap on, I figured out how best to depict them and how they would communicate. Zandor, Tara, and Dorno were pretty easy, seeing as they speak a language we all understand.

You're joined here by Craig Rousseau on art, who is the perfect match for the cartoony animation roots of *The Herculoids* given his celebrated work on titles like *Impulse*, *The Perhapanauts*, and others. The two of you previously collaborated not too long ago on *Young Hellboy*. How is it being reunited with Craig and having him bring these new stories to the page? And related to that, this first issue features a cover by *Hellboy* creator Mike Mignola, with whom you also have a long history.

Craig was the first person I thought of when I found out that I got the job. His style fit perfectly with what I saw going on in my skull, and I was ecstatic when he said yes to doing the book. Craig brings an amazing energy to my scripts, and his style really does tap into the nostalgic aspects of this series. I think people are really going to be blown away by the work he's doing here. And having a cover done by the phenomenal Mike Mignola is just the icing on the cake for a project that already was a dream come true.

***The Herculoids* joins the smash-hit *Space Ghost* as another Dynamite title that originated from the Hanna-Barbera animation legacy, with fun connections to comics luminaries like Alex Toth. Are there other dream crossover Hanna-Barbera characters that you'd like to see possibly interact with your take on *The Herculoids*?**

OH! I would LOVE to do a *Herculoids/Space Ghost* team up! I think *Space Ghost* writer David Pepose and I could come up with something truly spectacular. Also, I'm not sure if the *Herculoids* characters would mix properly with him, but I'd love to do a *Mighty Mightor* book. A superhero caveman would be right up my alley.
